gifts a study in comparative law is the first broad based study of the law governing the giving and revocation of gifts ever attempted gift giving is everywhere governed by social and customary norms before it encounters the law and the giving of gifts

takes place largely outside of the marketplace as a result of these two characteristics the law of gifts provides an optimal lens through which to examine how different legal systems engage with social practice the law of gifts is well developed both in the civil and the common laws richard hyland's study provides an excellent view of the ways in which different civil and common law jurisdictions confront common issues the legal systems discussed include principally in the common law those of great britain the united states and india and in the civil law the private law systems of belgium and france germany italy and spain professor hyland also serves a critique of the dominant method in the field which is a form of functionalism based on what is called the praesumptio similitudinis namely the axiom that once legal doctrine is stripped away developed legal systems tend to reach similar practical results his study demonstrates to the contrary that legal systems actually differ not only in their approach and conceptual structure but just as much in the results

chronic pain is a very common problem impacting on many patients assessment and management can be challenging the abc of pain focuses on the pain management issues often encountered in primary care covering major chronic pain presentations such as musculoskeletal pain low back pain and neuropathic pain the abc of pain also provides guidance on the management of pain in pregnancy children older adults drug dependency and the terminally ill beginning with an overview of the epidemiology of chronic pain pain mechanisms and the assessment of pain it then provides practical guidance on interventional procedures and methods of effective pain management the abc of pain is a comprehensive evidence based reference it is ideal for gps junior doctors nurse specialists in primary care palliative care specialists and also hospital and hospice staff managing chronically and terminally ill patients

colorectal cancer is a common cause of morbidity and mortality in which prevention screening and early detection are vital beginning with the patient perspective and following the patient pathway this new second edition covers epidemiology and prevention screening programmes decision support networks the role of primary care and supportive care for patients with colorectal cancer the abc of colorectal cancer provides the core knowledge on clinical genetics diagnosis imaging therapy and surgery options and the latest evidence based guidelines for treating and managing colorectal cancer patients within the multidisciplinary team highly illustrated and accessible it covers the full spectrum of the disease to provide the basis to make a real difference to clinical management this is an invaluable practical guide for the non specialist on all aspects of colorectal cancer and is ideal for general practitioners junior doctors nurses and allied health professionals
